

CATHOLIC PARISH APPS

FROM OUR SUNDAY VISITOR APPS, LLC

In today's world, parishioners are often too busy to keep up-to-date on parish life. Catholic Parish Apps from **Our Sunday Visitor Apps, LLC** provides a way to connect with parishioners through a mobile device – where most people are living today. Mobile applications make it easier to keep parishioners informed, especially young adults and families with busy schedules. Connect with all generations through the app with parish announcements, timely push notifications, evangelization, catechesis, and donations.

Features

- **Custom designed:** Your parish name, logo and colors, branded to your parish in all app store listings, and content specifically for your organization
- **Catholic content:** Your app can help foster spiritual growth and provide education about the Catholic faith without additional work for administrators
- **Use push notifications:** Send notifications for ministries, faith formation families, cancellations, events, or weekly message from Pastor
- **Donations:** Connect your Online Giving from **Our Sunday Visitor** or other online donation accounts so you never miss out on offertory or special collections
- **Connected to your Faith in Action website:** Integrate your website calendar, live streaming, social media, and more for one point for making updates.

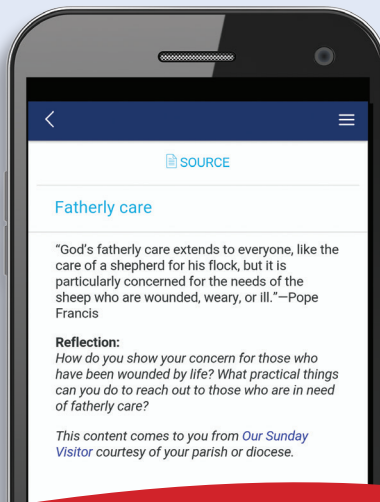

Uses

- Use Catholic content to help catechize – Pope Francis reflections, daily Scripture readings, Catholic news and stories are all built into the app.
- Reach all generations and demographics in the parish on mobile devices – connect with those who often don't see the parish bulletin or social media news
- Use push communications to send messages or alerts to your entire parish or create groups of subscribers for the most highly targeted and relevant announcements and messages

The OSV App Advantage

- We provide a specialist for each app so your unique look represents the vision and mission of your organization
- Every app is listed individually in all app stores for each search capabilities
- Multiple languages for editors
